

# **The future world.**

Theories about 2050 year.

CyFy films will be tried to predict the future, but the reality is, usually, most surprising.

2020 - 2025

In the field of health, we will be able to diagnose diseases, or even, we will can predict them with our wereables devices instantly. The artificial intelligence will diagnose better than human doctors, on consequence, our life hope ups to 150 years old.

2025-2030

All devices and everyday objects will be connected to the internet and we will be “hyperconnected” having access to all kinds of information instantly, but we will have sold our privacy.

2030-2035

We may have overpopulation but food technology will have evolved allowing us to print food economically and without health risks. It will be more economical to offer food to the poorest countries and in better conditions, but our problem will still be our garbage.

2035-2045

On this matter, a new technology developed over the year 2035 will allow us to reuse all the plastic created, and two years later the production of new plastic will be prohibited. by 2040 our waste will have been reduced by 65%.

2045-2050

In the year 2045 skynet will become aware, starting the great war against robots as predicted by the Terminator's movies. In Spain, the resistance is led by a wise television broadcaster who is still alive despite his age, Jordy Hurtado.
