

## INTRODUCE MYSELF

I'd like to introduce myself , I'm Antonio Ferrer Lopez, I was born in Valencia. I've thirty-eight years old and I'm a Techno-freak.

When I had around 10 years, for my "First communion" I did a bit present from my uncle, but it change my life. My MSX hit-bit version and a lot of books for start in Informatics world. At that moment I decided learn about it beyond the basic language.

At the end of the EGB, I did decide my professional goals, first study industrial electronic, for second stage, study telecommunication Degree, and for end, programming development.

But, for problems, I stopped my route at first step for a lot of year. I started working in a Sony Gallery Shop of Valencia, later in Milar El Osito at La Eliana and, more later, I started at lightning study called Sayma, on this job i'd work making and programming lightning control systems and DMX control systems over five years, but the crisis come to Spain and us affecting seriously. After ERE I'd decide going to resume my studies.

Now I'm "It" Technical and I'm working in a Hotel on a maintenance department, at same time, I follow up my studies, I'm studding DAM in a semi-presential mode.

About my another interests, I really love Airsoft practice, I like go milsims campaign with my friends. I like sports and I participate in an OCR runs like Spartan Race or Iberian Race.

I like all music types, I doesn't have best music group but I like Metallica, or Dire straits, it depends of my emotional state.

On my free time (I don't have more time) I like test programming IOT thinks like Arduino gadgets or install and configure services on my Raspberry pi. I've a lot of thinks, sensors and instruments to play whit it. Programming relax me.

By other side, I like play videogames, my favorite is Leage of legends, an isometric MOVA game free to play, it's lot of addictive videogame.

On first position of my travel list be London. I have been in London for three times, only one time like a tourist, I love this place but, at this moment, this travel isn't for my economy.

In my near future I have a lot of projects on my mind , but first I will obtain my DAM-DAW degrees.

Antonio Ferrer Lopez .
